

MOINUL ISLAM BAPPI

E-Commerce Automation Engineer & AI Systems Specialist

Shopify Operations • AI / LLM Workflow Automation • API Integration • Full-Stack Systems • Order & Fulfillment Engineering

+880 1605-956421 | mib.bappi360@gmail.com | moinulislam.pro | linkedin.com/in/moinul-islam-bappi | github.com/mibx-69

Professional Summary

E-Commerce Automation Engineer with 4+ years of hands-on experience building custom business systems, AI/LLM workflows, API integrations, and scalable Shopify infrastructures. Specialized in converting operational bottlenecks into automated technical solutions—reducing manual workloads by up to 45% across order dispatch, fulfillment tracking, COD fraud prevention, and customer communication. Proven track record in full-stack architecture (Next.js, Node.js, PostgreSQL, REST/GraphQL APIs) combined with workflow automation engines (n8n, webhooks) to drive e-commerce operational efficiency and multi-channel revenue growth. Interactive project demonstrations and video walkthroughs available at moinulislam.pro.

Core Competencies & Impact Highlights

- **45% Manual Workload Reduction:** Engineered end-to-end Shopify-to-Courier webhook and API integrations, automating 1,000+ daily order dispatch workflows and real-time status updates.
- **Custom E-Commerce Architecture:** Built multi-tenant fulfillment engines, automated COD risk assessment platforms, and real-time reporting dashboards using Next.js, Supabase, and Node.js.
- **Revenue Operations:** Maintained and optimized technical infrastructure for stores generating BDT 13+ lakh in monthly revenue while managing integrated marketing analytics and tracking.
- **AI / LLM Workflow Automation:** Deployed production AI agents, dynamic customer messaging bots, and automated workflows using Gemini, Claude, and OpenAI APIs.

Professional Experience

Head of IT & E-Commerce Automation Lead | Universes (E-commerce)

Sep 2025 – Present | Dhaka, Bangladesh

- Own end-to-end technology architecture, Shopify storefront management, and operational automation for multi-channel e-commerce operations.
- Engineered custom Shopify-Pathao API/webhook integration, automating processing for 700+ monthly orders and eliminating manual dispatch entries.
- Reduced internal operational workload by 45% through custom automated reporting, COD fraud risk tagging, and automated customer SMS notifications.

- Managed technical tracking and campaign setup across Meta, Google, and TikTok, generating BDT 10+ lakh in monthly revenue on under BDT 1 lakh ad spend.
- Designed mobile-first Shopify Liquid storefronts ([GitHub Repository](#)) optimized for UX, technical SEO, Ajax cart interactions, and high conversion rates.

Lead Automation & Systems Engineer | MiBx Team

Jan 2025 – Present

- Architect and maintain production automation systems for customer support, order tracking, and internal team workflows using n8n, Python, JavaScript, and REST APIs.
- Deploy AI/LLM workflows (Gemini, Claude APIs) and Telegram/WhatsApp bots to handle real-time customer queries and operational alerts.
- Manage Linux/VPS server infrastructure, PostgreSQL/Supabase databases, Docker environments, and security controls (OAuth 2.0, JWT, HMAC, RLS).

E-Commerce Systems & Automation Consultant | MiBrand & Independent

Jan 2021 – Present

- Delivered 100+ technical, e-commerce, and automation projects for international clients across 5+ markets with an 85%+ retention rate.
- Built custom business automations for clients, reducing manual operational workloads by 40% through n8n, AI APIs, and webhook pipelines.
- Architected bespoke software solutions including COD fraud screening engines, full-stack transactional backends, and multi-courier fulfillment engines.

Key Technical Projects

MiBx Dispatch / MiBx-ORM — Shopify to Pathao Automation System

Live App: orders.universesraw.com | GitHub: github.com/MiBx-69/MiBx-Dispatch

Tech: Next.js, React, Shopify GraphQL/REST APIs, Pathao API/Webhooks, Google Drive API, Gemini AI

- **Problem Solved:** Manual entry and processing of 50–100 daily orders causing significant dispatch bottlenecks.
- **Solution & Impact:** Engineered a bulk dispatch workflow capable of processing 1,000+ orders within seconds. Integrated Shopify and Pathao webhooks for automated order status synchronization, automated SMS dispatch alerts, COD risk scoring, and real-time revenue analytics dashboards. Reduced operational workload by ~45%.

Shopify Fraud Shield — Automated COD Risk Engine

GitHub: github.com/MiBx-69/shopify-fraudcheck-api

Tech: Next.js, TypeScript, Shopify API/Webhooks, HMAC SHA-256 Verification

- Built automated Cash-On-Delivery (COD) risk assessment logic analyzing historical customer orders and courier return data to auto-tag risk tiers and apply fulfillment holds.

Universes Raw — Custom Shopify Theme & Storefront

GitHub: github.com/MiBx-69/universesraw-theme

Tech: Shopify Liquid, JavaScript, Ajax Cart, Performance Optimization, Conversion-Focused UX

- Designed and developed a mobile-first storefront with dynamic commerce experiences, custom cart interactions, and performance optimization.

Shopify Multi-Courier Fulfillment Platform

Tech: Next.js, TypeScript, Supabase, PostgreSQL, Shopify GraphQL, Webhooks

- Engineered fulfillment infrastructure supporting REDX, Pathao, and Steadfast with real-time status synchronization, multi-tenant authorization, row-level security (RLS), encrypted credentials, and automated financial reconciliation.

SmartX — Secure Full-Stack Transactional Backend

Tech: React, Node.js, Express, Prisma, PostgreSQL, Redis, Docker

- Designed transactional backend architecture with ledger-based money handling, JWT/refresh token auth, RBAC, idempotent job workflows, and audit logging.

Technical Skills

- **Automation & AI:** n8n, LLM Workflows, Gemini/Claude/OpenAI APIs, AI Agents, Webhooks, Telegram/WhatsApp Bots, Prompt Engineering.
- **E-Commerce Systems:** Shopify, Shopify Liquid, Shopify Admin API, GraphQL, Webhooks, Metafields, Order Management, CRM, CRO.
- **Programming & Frameworks:** JavaScript, TypeScript, Python, Next.js, React, Node.js, Express, HTML5, CSS3.
- **Backend, Data & Security:** REST APIs, PostgreSQL, Supabase, Prisma, Redis, OAuth 2.0, JWT, RBAC, RLS, HMAC Encryption, Docker, Linux/VPS.
- **Growth Tech & Analytics:** Meta Pixel & CAPI, Google Tag Manager (GTM), Google Analytics 4, Technical SEO.

Certifications

- **AI Prompt Engineering** — AWS
- **Claude AI Fluency 101** — Anthropic
- **Google IT Support Professional Certificate** — Google
- **Meta Certified Digital Marketing Associate** — Meta
- **HubSpot SEO & Digital Marketing** — HubSpot

Education & Languages

High School Diploma — Begum Rasul Jan Abdul Bari High School

Languages: Bengali (Native) | English (Fluent) | Hindi (Conversational)
